Kajaria
INDIA'S NO. 1 TILE COMPANY

ABOUT KAJARIA

Kajaria Ceramics is the largest manufacturer of Ceramic/ Vitrified tiles in India. It has an annual capacity of 90.50 mn. sq. meters, distributed across nine plants.

The manufacturing units are equipped with cutting-edge technology consisting of intense automation, robotic car application, and zero chance for human errors - these are just a few reasons why Kajaria remains at the top of the industry.

The best in providing tile solutions, Kajaria has grown stronger with its hard work, innovation, and patronage from our discerning customers.

Srikalahasti Plant, Andhra Pradesh

**CONTINUA+ TECHNOLOGY &
ADVANCED DIGITAL GLAZE MACHINE**

OUR FACILITIES ARE EQUIPPED
WITH CONTINUA+ TECHNOLOGY
THAT ACHIEVES:

Production of large slabs using
automated pressing technology

Superior surface flatness when
compared to conventional pressing

Greater body strength and flexibility
due to uniform roller pressing

Consistent and homogenous density

Unequalled shine, perfect slab planarity

BEAUTIFULLY ELEGANT,
TECHNICALLY SUPERIOR,

FEATURES

These collections are versatile and durable, making them suitable for a wide range of applications.

For wall application

For floor application

Stain Resistant

Scratch Resistant

High Abrasion Resistance

High Flexural Strength

Easy Installation

Zero Maintenance

Fire Resistant

Thermal Resistant

Chemical Resistant

Easy to clean

APPLICATION

Since our collection is widely used across various applications, we prioritize ensuring that all quality standards are met before it is put to use.

Airports

FINISHES

SUPERWHITE

With an 'L' value of more than 94, these striking white tiles promise the whitest finish available in India.

BOLD | PREMIUM BOLD

As suggested by the descriptor 'bold', this finish has a rock like effect. With the use of special technique and digital glaze machine, these special effects are created to give a real life stone effect.

ALPHATECH

Offering a Matt surface with near-zero reflection along with gloss carving seamlessly blending sophistication and elegance. Its subtle sheen accents enhance contrast, elevating design and visual appeal to new heights.

MARBLETECH

The elegant look and feel of real marble in terms of touch, feel and shine makes it difficult to distinguish between the Ultima slabs and real marble.

POLISH | PREMIUM POLISH

The most premium transparent glaze that ensures a graphic and unparalleled sharpness, giving it a high definition retina image, you can almost use it as a mirror.

MATT

With a sophisticated matt finish and high durability, these tiles can withstand heavy footfall and yet, they're easily maintained.

BLEND

These tiles are inspired by nature, and are made and designed using rare minerals and metals in their veins and drafted with precision, to impart real shine, adding a realistic touch of nature to your home.

BLISS

These are decor tiles which come with an emboss feel. Made using high quality special glaze and a digital machine, they have a unique texture which gives line/arrow punch effect.

BEYOND

A luxury series in tile design, with the most premium surface. These tiles are developed with advanced digital technology. Almost Zero Surface Reflection, with wider possibilities of tonalities and intensity, and the finest integration of designs and elegance.

ALCAMO

COLLECTION

Kajaria
INDIA'S NO. 1 TILE COMPANY

BEIGE

1200X
2400MM

This collection is carefully curated to redefine luxury and sophistication. Inspired by the serene charm of the Mediterranean town of Alcamo, this collection encapsulates the purity and grandeur of natural marble, offering an exquisite blend of tradition and modernity. Each tile in this collection is a masterpiece offering soft tonal variations that mirror the beauty of authentic marble, making them a perfect choice for spaces that demand refinement and grace. Alcamo focuses on the subtle elegance of natural marble, offering an opulent look, ideal for creating serene, uncluttered spaces that exude class.

CARDOSO

COLLECTION

Kajaria
INDIA'S NO. 1 TILE COMPANY

SILVER

1200X
2400MM

The CORDOSO GVT Tile Collection captures the refined and timeless essence of natural slates inspired by the landscapes and architectural heritage of India. These stones seamlessly integrate with the natural environment, embodying a style that is both elegant and modern. This collection has been meticulously crafted to replicate the distinctive charm of these remarkable slates, which naturally enhance contemporary architectural spaces. Through impeccable design and the expertise of skilled artisans, the CORDOSO tiles exhibit the authentic character of natural stone-visually striking yet smooth and gentle to the touch. The CORDOSO Collection is a ceramic masterpiece that combines the understated elegance of natural slates with a dynamic, modern aesthetic, offering a versatile solution for sophisticated interior and exterior designs.

MOONSTONE COLLECTION

Kajaria
INDIA'S NO. 1 TILE COMPANY

ASH

1200X
2400MM

The Moon Stone Collection is a tribute to the captivating beauty of the moon's surface as it appears before a lunar eclipse. The collection draws inspiration from the subtle textures, serene tones, and mesmerizing patterns that reflect the moon's mystical aura during this rare celestial event. Meticulously designed, the Moon Stone Collection reimagines this natural phenomenon in the form of exquisite tiles that exude elegance and sophistication. Each tile replicates the soft gradients and distinctive patterns of the moon's surface, offering a unique blend of visual intrigue and natural charm. Crafted with cutting-edge technology and a commitment to perfection, the Moon Stone Collection mirrors the timeless allure of lunar beauty, making it an ideal choice for creating spaces that are both tranquil and awe-inspiring. With its harmonious blend of strength and finesse, this collection transforms interiors into spaces that resonate with the serene magnificence of the cosmos.

TRANSPORTATION, HANDLING AND STORAGE OF ULTIMA SLAB

When transporting the Ultima slabs, they must be secured properly to avoid storage problems. If the tiles are transported over a short distance, the Ultima slabs should be kept vertically in the vehicle and at back side of slabs there should be proper packing or ply to avoid breakage. If the tiles are transported over a longer distance, they should be kept on an A shape frame, as shown in Fig A and B. With this method, we can avoid any breakage of slabs during transit.

MANUAL HANDLING OF ULTIMA SLAB

When handling Ultima slabs manually, the primary tool used is the regular suction cup (Fig. A and B). Using these, workers can shift the tiles easily.

The suction cup should be attached to the face of the tile, not to the back. The suction cups should be attached to the face of the tile, not to the back.

If the surface of the slab is textured, the best way to handle the Ultima slabs manually is by using a Large Format Tile (LFT) Carrier System (Fig. C) with suction cups that hold the tile from all four sides. By using this method, workers can lift or shift the tiles easily without any damage and will require the manpower of two people.

Fig. F

STORAGE

The Ultima slabs should be stored on an A shape frame, made up of wood or steel with rubber lining, as shown below.

LAYING & FIXING

a) The Ultima slabs are very heavy, large-sized, and have sharp edges. So, it is important for the people transporting the tiles to wear protective gear like gloves during transportation. We also recommend the use of double or triple suction cups for a firm grip of the tile while ensuring the safety of the operator. Before transporting the tile, it should be thoroughly cleaned to get rid of any dust or moisture and make sure that the grip of the tile is not compromised. Then the suction cups should be placed on the face of the tile and be checked for how well they are stuck to the surface before lifting the tile.

To handle the large-sized slabs like Ultima slabs, we recommend using a special LFT carrier system with four suction cups.

b) The following points should be considered while laying the Ultima slabs.

1. The subfloor or the laying surface should be prepared properly before laying the Ultima slabs. The laying surface should be rigid, non-flexing, and capable of supporting the expected load with minimal or no deflection.
2. A leveled subfloor is extremely important to keep the Ultima slabs from cracking.
3. Provision of proper curing for the subfloor, for around 24 to 48 hours before tiling work.

For internal or external application, it is essential to select the appropriate cement-based, fiber-reinforced or ready-mixed adhesive to ensure that the Ultima slabs are properly fixed.

Fig. H

Fig. I

4. Once the subfloor is clean and ready, the adhesive should be spread evenly covering the entire area using a 10x10mm square notch trowel (Fig. G). The adhesive should cover 5cm to 10cm more than the size of the Ultima slabs. The adhesive should always be applied in stripes running parallel with the short edge to remove any air pockets or bubbles.
5. The Ultima slabs require back-buttering due to their large format. Back-buttering means applying a layer of adhesive at the back of the tile using a trowel (Fig. I). The Ultima slabs should be fixed on a handling frame with the use of suction cups in a vertical position, as shown in Fig. C.
6. To apply adhesive on the laying surface, a 10x10mm square notch trowel should be used whereas a 5x5mm square notch trowel should be used for back-buttering.
7. After fixing the Ultima slabs on a handling frame with the use of suction cups in a vertical position, it should be lowered slowly into a horizontal position and firmly pressed into the adhesive along with a surface vibrator or a rubber mallet.
8. Use a levelling system to avoidlippage and give a smooth and even surface at every joint. Levelling systems are available from 1mm to 10mm.
9. A closer system can be used to close the tiles nearer to each other and shift the tile slightly up and down at the time of fixing.
10. The back of the slab must be regularly checked to make sure that there is full contact between the adhesive and the tile surface. If a hollow sound is heard during fixing, the tile should be lifted again and provided with extra adhesive at that particular area to give proper strength to the tile.
11. After completing the tiling work, it is recommended to put a protection sheet on tiles until the completion of all civil work. It is recommended that the grouting work be done at the very last, after completing all civil work. We can use sanded grouts with hardener or epoxy grout, depending on the area of usage or as per instructions of the site in-charge.

TOOLS RECOMMENDED FOR ULTIMA SLABS

TILE CUTTING

Mark the portion to be cut out from the ends of the Ultima slab using a pencil. Then, properly position the cutting guide with a cutting carriage so that the references on the guide coincide with the lines marked on the slab. Lock the cutting. Guide with the cutting carriage in place using the suction cups. It is vital to keep the pressure and movement of the cutting carriage constant along the whole length of the cut to ensure correct scoring.

Score one end of the slab by 15cm pushing the cutting carriage towards the edge of the slab. Complete the scoring up to the opposite end of the slab.

CLEANING

CLEANING AFTER LAYING

After laying the Ultima slabs on the floor or wall, it should be cleaned well to remove any residual grouting and the normal dirt acquired from building works.

A cementitious de-scaler can be used for cleaning the joints, as it is mildly acidic and does not emit harmful fumes, ensuring the safety of the user. In case of material laid with epoxy or resinous grouting, it is recommended to clean after laying with specific detergent or tile cleaner.

REGULAR MAINTENANCE

To clean the floor thoroughly, we recommend using a natural detergent with high cleaning power. In case of strong dirt that gets encrusted with time, we recommend consulting the following ways to find the perfect solution to every situation:

TYPE OF DIRT	PRODUCT
Cement, Metal traces, rust	Cementitious descaler
Residuals, stains and halos of epoxy joints	Epoxy descaler
Grease, tire marks, colours, markers etc.	Non soap degreaser
Graffiti	Axstone and anti-graffiti

RECOMMENDATIONS

Drying Process

Once the tiles have been grouted and the excess grout has been cleaned off, it is important to wait till the tiled surface is dried completely before cleaning. The recommended waiting time is 5 days, before cleaning or using the tiled surface.

Protecting from Liquid

The newly tiled surface must be protected from water and moisture while the adhesive and grouting materials are maturing and hardening. This is particularly important for outdoor spaces and areas, where there is a risk of freezing.

Damage Prevention

It is important to protect the newly tiled surface against mechanical or chemical damage resulting from subsequent work carried out by other professionals or due to later installations. Damage can be prevented by covering the floor tiles with thick cardboard or similar material.

Cleaning Products

For the final cleaning of the tiled surface, the products used should be compatible with the chemical resistance of the tiles. Avoid using solid detergents with abrasive particles and solutions containing hydrofluoric acid, which attacks the glaze and causes irreversible damage to the vitrified tile.

PACKING DETAILS

DIMENSIONS (MM)	NO. OF SLABS/BOX	COVERAGE AREA
1200x2400	01	2.88 M ²
1200x1800	02	4.32 M ²
1200x1200	02	2.88 M ²
800x1600	02	2.56 M ²

* Resistance to acids & alkalis (Exception of Hydrofluoric acid & its compounds)

** Vitrified tiles have resistance to most of the stains / chemicals but, it is recommended to take due care while laying and for day-to-day maintenance.

* Applicable in Gailpur plant only.

- Colours in the catalogue are as accurate as printing process allows. Please check actual tile sample before making the final selection.
- Sizes mentioned in the catalogue are nominal sizes only.
- No claim will be entertained once the tiles are fixed.
- For better laying, please follow the instructions on the packaging box.
- In case it is required to lay the tiles on wall or floor in STAGGERED PATTERN, then always lay them in Overlap 20:80 ratio, as shown in VISUAL 1 instead of Brick pattern (overlap 50:50 ratio), as shown in VISUAL 2.

Please make sure to check the shade/finish with the sales agent/dealer before making the final purchase because there might be variation in actual finish and that shown in the catalogue. The company will not bear any loss in such case.
